

Exam Requirements

The scope of the exam is as follows:

1. Chapters 1–5, 7, 8, 11, 12, and 14–16 of the course book to the extent these parts have been considered in the lectures. The lecture slides mostly cover the subject, but not completely. It will be necessary to use the book at least for the figures and tables and perhaps for additional clarifying examples.
2. Tutorials and home assignments. One of the exam problems will be taken directly from these (possibly with minor parameter modifications).
3. NOTE: All home assignments must be received by April 28.

Good luck for your exam! (May 6, 13–16, S1).
