

Exam Requirements

The scope of the exam is as follows:

1. The lecture slides.
2. Chapters 1–5, 8, 11, 12, and 15 of Wicker’s book and Chapters 7–8 of Moreira & Farrell’s book to the extent these parts have been considered in the lectures. The lecture slides cover the subject very well, but not completely, and it will be necessary to use the books at least for the figures and tables and perhaps additional clarifying examples.
3. Example 1.4. and Figure 1.3. from the tutorial article “Network Coding Theory”, <http://iest2.ie.cuhk.edu.hk/~whyung/publications/tutorial.pdf>
4. Tutorials and home assignments. One exam problem will be (at least almost) directly from tutorials or home work.
5. It is a CLOSED BOOK exam, and no other electronic equipment than a calculator is allowed.

Good luck!
